

Hosted Exchange Mobility Services

ciracom

Companies are embracing mobility because it increases employee productivity, improves customer responsiveness and enhances their overall competitive position. SMBs and Enterprises alike have an increasing need to connect people, processes, and technologies outside the traditional workspace due to drivers such as globalization, outsourcing and the changing nature of the workforce.

With Ciracom mobility services, your data is always accessible and reliable – regardless of your interface. Work using your Outlook Client, OWA or your mobile device, it doesn't matter; your data will be up-to-date and consistent, because our service provides **two-way synchronization** of:

- **Email:** Compose, read and send from any location, and all actions are captured regardless of the source. For example, read a message on your BlackBerry®, and from Outlook you will see that message marked as “read”.
- **Personal Contacts and Tasks:** Conveniently access and update your personal contacts and tasks.
- **Calendaring:** Review or update your calendar, schedule and respond to requests as well as be alerted when appointment reminders trigger.

There is never a need to dock or cradle your device, the synchronization is seamless. Also, unlike basic mobile integrations, our solution also includes these services:

- **Global Address List (GAL) Access:** Real-time access to your company address book with search capability making sending email easy.
- **Loss Protection:** 24x7x365 remote “kill” capability. If your device is stolen or misplaced, you can remotely disable it and erase the data to ensure your privacy.
- **Anti-Virus/Anti-Spam:** All email is subject to full anti-virus and anti-spam protection.

The Ciracom Solution

Ciracom has over 11 years of email hosting experience and over 7 years experience supporting mobility solutions. We give you the ability to deploy to a single user, several users or across your organization. We support the following technologies:

- BlackBerry® smartphones
- Microsoft Windows Mobile® (ActiveSync®)
- Good™ Mobile

- **Gain an additional 250 hours per year/per user of productive work time.**
- **Provide better customer service with the ability to communicate quickly anytime, anywhere.**
- **Support virtual workers, traveling employees and flexible work schedules.**
